

Scrum Meeting Notes 11-21-2021

- Agenda
 - End of Sprint 2
 - Retrospective
 - Sprint Materials 2 Due
 - What needs to be done
- The Birthday recommendation and IGDB recommendations are completed. They need to be implemented in the front-end
- Platform and multiplayer are also completed and need to be implemented on the front-end.
- Raj has been very busy this week and has not worked on the front-end however, will implement the required stuff as soon as possible.
- Aayush said the Twitter filtering is not as advanced as we thought it would be. The tweets that are received can only go back a certain amount of time i.e one year.
- The multiplayer and platform function for the RAWG controller need to be fine-tuned in order to work the entire time, but it has some issues right now.
- Martin and Jakob said that the Twitch/IGDB secrets/credentials have some issues right now however, it can be fixed really quickly.
- Raj said the text and video guidance is very basic right now however, due to other classes he will make it really nice over thanksgiving break.
- The end of the sprint 2 is today, we need to have a retrospective later today in order to talk about what went well and what did not.
- Sprint 2 materials are due tonight as well. Jakob will handle meeting 1, Mark handles meeting 2, and Martin handles meeting 3. Mark will also handle the summary. Jakob will handle the product backlogs and charts.
